

Aerospace Center for Education (ACE)

Mission

The mission of the Aerospace Center for Education is to strengthen America's youth by promoting interest in aerospace science, thereby enabling the United States Air Force and our Nation to continue leading the world in aerospace technology and national defense.

Science is classified as an "elective subject" for Kindergarten through 6th grade students in most Utah school districts. The ACE experience will enhance and inspire these students to choose science as an elective and possibly pursue an aerospace-related field as a career.
